

TRUESENTRY MOBILE INTEGRATED IN-CAR VIDEO

TrueSentry Mobile is a unique in-car video system that combines the power of TrueSentry's advanced video surveillance with a flexible hardware solution.

TrueSentry Mobile offers all the features of a typical in-car solution and adds functionality including:

- Patented-pending, live rate-adaptive video upload to the central station
- Deep integration with Computer-Aided Dispatch and other systems
- Automatic video archive syncing to a TrueSentry digital evidence vault

Since TrueSentry Mobile is an IP-based solution based on solid-state hardware for maximum reliability and cost effectiveness. TrueSentry Mobile costs a fraction of some other systems.

Unique Video Upload

View live video from mobile police units, fire, EMS, transportation vehicles. See through the dashboard for officer safety and court evidence. **IACP study shows that 93% of complaints could clear the police officer with audio/video evidence.**

- Seamlessly handles network outage and IP address changes
- Rate adaptive video instantly adjusts to bandwidth variances
- Roaming mode uses best connection in mixed city networks

Digital Evidence Vault

Existing MDT laptops are used to record to rugged, durable solid-state drives. The secure storage server runs a TrueSentry database which stores multiple terabytes of audio/video to give you extended storage.

Video archive from the mobile unit to the storage service boasts the industry's fastest sync time. TrueSentry mobile is designed to quickly sync data from the laptop, USB drive, or SD Card into the evidence vault. Wireless sync is an option.

- Smart evidence search based on flexible criteria
- Burn straight to a DVD in classic MPEG-2 format to run on any DVD player for court evidence

Deep Public Safety Integration

TrueSentry is the only CAD integrated video system that lets you simply type in the unit number for instant in-car video of that unit.

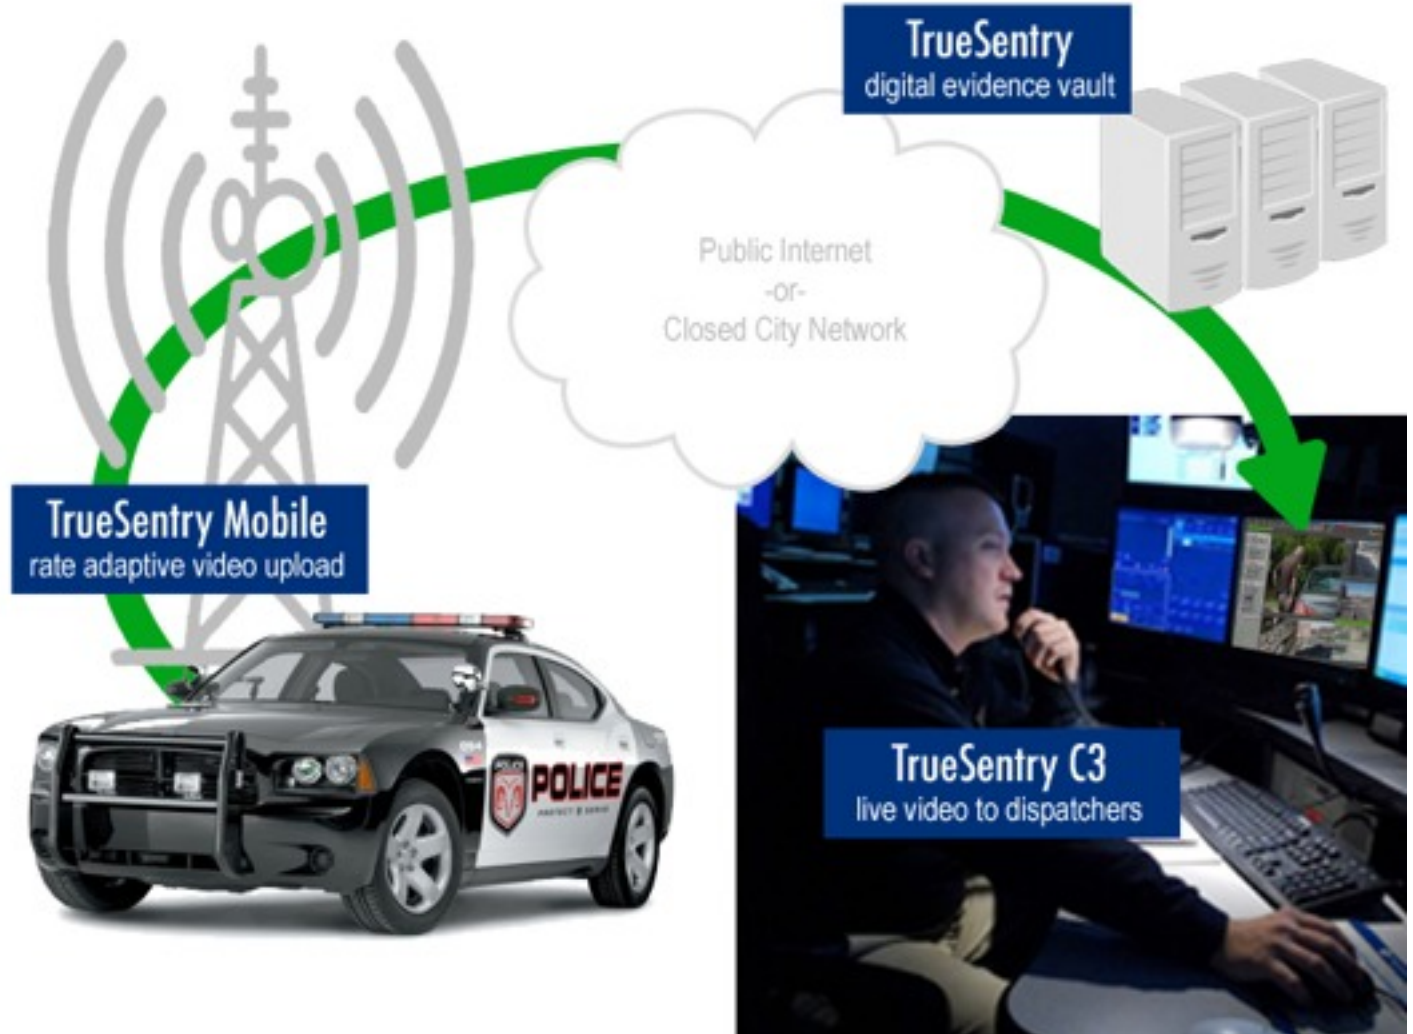

- Automatically record and stream video/audio on lights or wireless microphone activation
- Instant popups and single click for full screen viewing
- Dispatcher can view live and recorded video on each unit from any desktop or web browser
- Inter-agency officials can securely view live in-car video
- Connect to traffic cameras, outdoor cameras, and cameras inside government buildings, schools, businesses, banks, etc.

TrueSystems is the leader in Video Management, Video Surveillance and Security Management technologies. TrueSystems' deep history of experience in network camera management goes back to 1995. During this period, we have deployed hundreds of cameras on every continent of the globe (including the NASA camera on the South Pole). This world-wide network of IP-based cameras has captured over 1.5 Billion media clips and delivered them to more than 70 Million users with a 99.999% service up-time. We have also been pioneers of IP camera technology having built the world's first pan/tilt/zoom (PTZ) network camera.

TRUESENTRY MOBILE

INTEGRATED IN-CAR VIDEO

Designed To Run On MDTs

TrueSentry Mobile is designed to run on the MDT laptop in the car. The software is very low overhead since the video encoding/compression is done inside the camera.

Use the Search tab to see video thumbnails and choose from for all events within a time range based on: offense, driver license #, ticket #, notes, vehicle ID, officer name.

TrueSentry partners with MDT vendors for a low-cost, integrated add-on. Future features to include:

- License plate recognition with NCIC lookups
- Integrated TrueLocate GPS tracking
